

BIDI PIGS

PRODUCT DESCRIPTION

The PEI BIDI pigs are equipped with six discs, two being guide discs on either end to ease the loading and to support the body weight, then four seal discs to maintain the seal when traversing the line. The BIDI pigs may be run in either direction, and are most often used in new construction during line fill and dewatering applications. The BIDI pigs will traverse 1.5 D bends, reductions up to 20% and are available in sizes 16" and larger.

Model: BIDI6D
BIDIRECTIONAL PIG
