

MEASUREMENT

**Pipeline Equipment, Inc.**

Pipeline Equipment, Inc. (PEI) fabricates liquid and gas measurement equipment to customer specifications and all applicable codes. PEI will fabricate using single or dual chamber orifice fittings, ultrasonic meters, turbine meters, positive displacement meters, coriolis meters, and any equipment required to assure the precise measurement of the product. PEI can provide single meter runs as well as complete, multiple run meter skids with buildings and all necessary instrumentation. PEI offers pressure regulator skids, flow control skids and station buildings including EGM, Analyzer, MCC, and Control. Experienced engineering, design, drafting, fabrication, testing, Quality Control, programming, and start up assistance are additional services provided by Pipeline Equipment, Inc.
